# Contents

	<b>Preface</b>	<b>ix</b>
<b>1</b>	<b>Formation of Natural Soil Deposits</b>	<b>1</b>
1-1	Introduction	1
1-2	Rocks—The Sources of Soils	1
1-3	Rock Weathering and Soil Formation	3
1-4	Soil Deposits	4
<b>2</b>	<b>Engineering Properties of Soils</b>	<b>9</b>
2-1	Soil Types	9
2-2	Grain-Size Analysis	10
2-3	Soil Consistency—Atterberg Limits	16
2-4	Soil Classification Systems	20
2-5	Components of Soils	31
2-6	Weight/Mass and Volume Relationships	32
2-7	Permeability, Capillarity, and Frost Heave	39
2-8	Compressibility	40
2-9	Shear Strength	41
2-10	Compaction—Improving Engineering Properties of Soil	42
2-11	Compactness—Relative Density	42
2-12	Problems	44
<b>3</b>	<b>Soil Exploration</b>	<b>47</b>
3-1	Introduction	47
3-2	Reconnaissance	47
3-3	Steps of Soil Exploration	48
3-4	Groundwater Table	57
3-5	Standard Penetration Test (ASTM D 1586)	59
3-6	Cone Penetration Test (ASTM D 3441 AND D 5778)	64
3-7	Vane Test	67
3-8	Geophysical Methods of Soil Exploration	73

3-9	Record of Soil Exploration	80
3-10	Conclusion	81
3-11	Problems	83
<b>4</b>	<b><i>Soil Compaction and Stabilization</i></b>	<b>85</b>
4-1	Definition and Purpose of Compaction	85
4-2	Laboratory Compaction Tests (ASTM D 698 and D 1557)	86
4-3	Factors Affecting Compaction of Soil	90
4-4	Field Compaction	94
4-5	Vibroflotation	97
4-6	Dynamic Compaction	99
4-7	In-Place Soil Unit Weight Test	102
4-8	Field Control of Compaction	109
4-9	Soil Stabilization	112
4-10	Problems	115
<b>5</b>	<b><i>Water in Soil</i></b>	<b>119</b>
5-1	Introduction	119
5-2	Flow of Water in Soils	119
5-3	Capillary Rise in Soils	135
5-4	Frost Action in Soils	138
5-5	Flow Nets and Seepage	138
5-6	Problems	144
<b>6</b>	<b><i>Stress Distribution in Soil</i></b>	<b>149</b>
6-1	Introduction	149
6-2	Vertical Pressure Below a Concentrated Load	149
6-3	Vertical Pressure Below a Loaded Surface Area (Uniform Load)	154
6-4	Problems	174
<b>7</b>	<b><i>Consolidation of Soil and Settlement of Structures</i></b>	<b>177</b>
7-1	Introduction	177
7-2	Immediate Settlement of Loads on Clay	179
7-3	Consolidation Test	181
7-4	Normally Consolidated Clay	192

- 7-5 Overconsolidated Clay 193
- 7-6 Field Consolidation Line 195
- 7-7 Settlement of Loads on Clay Due to Primary Consolidation 199
- 7-8 Time Rate of Settlement Due to Primary Consolidation 208
- 7-9 Settlement of Loads on Clay Due to Secondary Compression 221
- 7-10 Settlement of Loads on Sand 224
- 7-11 Problems 239

## **8 *Shear Strength of Soil* 245**

- 8-1 Introduction 245
- 8-2 Methods of Investigating Shear Strength 246
- 8-3 Characteristics of the Failure Plane 260
- 8-4 Shear Strength of Cohesionless Soils 266
- 8-5 Shear Strength of Cohesive Soils 266
- 8-6 Problems 273

## **9 *Shallow Foundations* 275**

- 9-1 Introduction 275
- 9-2 Loads on Foundations 278
- 9-3 Depth and Location of Foundations 279
- 9-4 Bearing Capacity Analysis 282
- 9-5 Size of Footings 306
- 9-6 Contact Pressure 311
- 9-7 Total and Differential Settlement 323
- 9-8 Structural Design of Footings 323
- 9-9 Problems 323

## **10 *Pile Foundations* 329**

- 10-1 Introduction 329
- 10-2 Types of Piles 329
- 10-3 Length of Piles 330
- 10-4 Pile Capacity 331
- 10-5 Pile-Driving Formulas 350
- 10-6 Pile Load Tests 354
- 10-7 Negative Skin Friction (Down Drag) 360

10-8	Pile Groups and Spacing of Piles	360
10-9	Efficiency of Pile Groups	360
10-10	Distribution of Loads in Pile Groups	367
10-11	Settlement of Pile Foundations	370
10-12	Construction of Pile Foundations	374
10-13	Problems	378
<b>11</b>	<b><i>Drilled Shaft Foundations</i></b>	<b>385</b>
11-1	Introduction	385
11-2	Bearing Capacity of Drilled Shafts	386
11-3	Settlement of Drilled Shafts	392
11-4	Construction and Inspection of Drilled Shafts	392
11-5	Problems	394
<b>12</b>	<b><i>Lateral Earth Pressure</i></b>	<b>397</b>
12-1	Introduction	397
12-2	Earth Pressure at Rest	398
12-3	Rankine Earth Pressures	405
12-4	Coulomb Earth Pressures	412
12-5	Effects of a Surcharge Load upon Active Thrust	418
12-6	Culmann's Graphic Solution	420
12-7	Lateral Earth Pressure on Braced Sheetings	426
12-8	Problems	432
<b>13</b>	<b><i>Retaining Structures</i></b>	<b>433</b>
13-1	Introduction	435
13-2	Retaining Walls	435
13-3	Design Considerations for Retaining Walls	437
13-4	Stability Analysis	437
13-5	Backfill Drainage	449
13-6	Settlement and Tilting	451
13-7	Reinforced Earth Walls	451
13-8	Slurry Trench Walls	456
13-9	Anchored Bulkheads	457
13-10	Problems	463

<b>14</b>	<b><i>Stability Analysis of Slopes</i></b>	<b>467</b>
14-1	Introduction	467
14-2	Analysis of a Mass Resting on an Inclined Layer of Impermeable Soil	468
14-3	Slopes in Homogeneous Cohesionless Soils ( $c = 0, \phi > 0$ )	471
14-4	Slopes in Homogeneous Soils Possessing Cohesion ( $c > 0, \phi = 0$ , and $c > 0, \phi > 0$ )	472
14-5	Method of Slices	485
14-6	Problems	492

# Preface

We have attempted to prepare an introductory, practical textbook for soil mechanics and foundations, which emphasizes design and practical applications that are supported by basic theory. Written in a simple and direct style that should make it very easy to read and understand the subject matter, this book contains an abundance of both example problems within each chapter and work problems at the end of each chapter. In addition, there are ample diagrams, charts, and illustrations throughout to help better explain the subject matter. In summary, we have tried to extract the salient and essential aspects of soils and foundations and to present them in a simple and straightforward manner.

The preceding paragraph, slightly modified, began the preface of the first six editions of *Soils and Foundations*, and we think that it aptly relates our basic philosophy in preparing the seventh edition. We have, however, deleted some outdated material, updated material where applicable, and added new and essential material to the seventh edition. We believe the result is a much stronger, more comprehensive, and therefore better book.

We urge students using this book to review each illustration as it is cited and to study each example problem very carefully. Believing that example problems are an extremely effective means of learning a subject such as soils and foundations, we have included an abundance of these problems, and we believe that they will be very useful in mastering the material in the book.

We want to express our sincere appreciation to Carlos G. Bell, formerly of The University of North Carolina at Charlotte, and to W. Kenneth Humphries, former Dean of Engineering at the University of South Carolina, who read our original manuscript and offered many helpful suggestions. Also, we would like to acknowledge the late Donald Steila of the Department of Geography and Earth Science at The University of North Carolina at Charlotte, who reviewed Chapter 1. We also thank Alan Stadler, formerly of the Department of Civil Engineering at The University of North Carolina at Charlotte, for reviewing the material on soil stabilization in Chapter 4. Finally, we thank the other reviewers of this edition for their helpful comments and suggestions: M. Sherif Aggour, University of Maryland, College Park; Mir M. Ali, University Of Illinois at Urbana–Champaign; Richard Eckstrom, Technical College of the Lowcountry; Mousa T. Gargari, University of Cincinnati; Timothy W. Jessup, Horry-Georgetown Technical College; and Zhaohui Yang, Ph.D., University of Alaska, Anchorage.

Incidentally, several users and reviewers of our book have suggested that we move Chapter 3 on soil exploration to follow Chapter 8 on shear strength of soil. The reason for the shift was to delay covering soil exploration until after more theory was covered. (In other words, we need to know what we are looking for before

we go looking for it.) We thought that was a good suggestion and planned on making the change. However, we soon realized that there are some cases in the intervening chapters where material covered in Chapter 3 is prerequisite. Hence, we decided not to make this change. The user may elect to delay fully covering Chapter 3 until after covering Chapter 8 while covering small parts of Chapter 3 as needed.

We hope that you will enjoy using the book. We would be pleased to receive your comments, suggestions, and/or criticisms.

*Cheng Liu  
Jack B. Evett  
Charlotte, North Carolina*

## **SUPPLEMENTS**

To access supplementary materials online, instructors need to request an instructor access code. Go to [www.prenhall.com](http://www.prenhall.com), click the **Instructor Resource Center** link, and then click **Register Today** for an instructor access code. Within 48 hours after registering you will receive a confirming e-mail including an instructor access code. Once you have received your code, go to the site and log on for full instructions on downloading the materials you wish to use.
