

# PORE's on line Catalogue

*Orgone Energy ( Life Energy ) materials and research equipment*

Here you may order equipment from our online catalog.  
 We make the highest quality life-orgone energy equipment available in the world.  
 Our orgone pillows, pads and pulsators are constructed of the best materials available.

PORE  
 PO Box 519  
 Boothbay, Maine 04537-0519  
 email: [life@orgone.org](mailto:life@orgone.org) 

We will ship anywhere in the world. Email us your request and we will return a quote on your choice of product we build or provide including shipping costs.

**Orgone-Pulsator © 1999-2001 Los Orgones -- \$225 plus shipping**  
*(only \$249 including shipping and handling in continental USA)*

## What is a Pulsator? How does it work? (this below answer is by Los Orgones... the inventors)

**Pulsator:** Brings back DOR to OR pulsation Concerning the Pulsator, it is the safest and most efficient device we know to clean rooms of DOR energy. It brings DOR back to OR pulsation in a steady and gentle way, avoiding the undesirable secondary effects of the use of oracs in discharge. The Pulsator, it consists in two orac panels facing each other on a base. The first one attracts DOR fields, generates a current and directs it toward the space between both panels. There the second one attracts it and expels it out, now as pulsating OR. We consider DOR is immobilized OR, in a state we call "Simultaneous Pulsation". In this state, expansion and contraction movements are stopped in a point in which their amplitudes are equal. The Pulsator, by generating a directed current, opens a gap between them, and doing so allows contraction and expansion to differentiate from each other. The result is OR pulsation. In this case again the corroboration is both perceptive and experimental. As orgonomists we all are forced to deal with the problems related to DOR manipulation. We use the Pulsator in our session rooms with excellent results. It's now distributed by PORE

The Orgone-Pulsator you can keep the energy in the room at normal levels and change any negative life energy back to positive life energy without overcharging or undercharging the space you live in. The room and people will feel the energetic charge in the air and you will feel more refreshed at the end of a days work. The orgone pulsator is also great to have in your bedroom, livingroom, or other rooms in your home that you want to improve the energy within. It will clear any room of negative life energy, electric fog, or dor. The Orgone-Pulsator returns it to active and healthy life energy. Most sensitive people can feel the flow of energy across the plates of this device. There are no wires or electricity used. It is an advanced design to get

life energy moving again using some of the scientific principles used in an orgone accumulator combined with new techniques never used before. A 30day moneyback guarantee is included with your purchase. We know you will be pleased with the performance of this item. The Orgone-Pulsator is a must for any room in which therapy or massage is done. In the past folks used ionizers, orgone shooters, orgone generators, or dor busters to change the energy in a room. Today we know these methods from the past would either overcharge a room or suck out most of the good life energy as well as the negative energy.

Dimensions 24"x12"x6" Weight 17lb.

Now is the time to buy an Orgone-Pulsator to improve your surroundings. The Orgone-Pulsator was created and designed by Los Orgones and is built and distributed by PORE.)

### **Electroscope ---**

Check any science catalogue ; ask your local schools for a catalogue. This is a very common instrument used in physical sciences. It is operated by creating a charge on metals (gold leaves and other designs) that will repel each other while charged and will not repel when there is no excess of a + or - charge. The rate of discharge is the measurement recorded at many intervals throughout the day. Reich used this with other instruments to measure changes in the atmosphere and in the accumulator. Measurements were taken over several months , even years that showed a direct correlation with the weather changes. Additional instruments to record temperature changes from within an accumulator and one from within a control box will demonstrate a relationship to weather changes and the electroscope. In addition recording humidity changes would be useful along with records of solar activity affecting earth.

---

### **Orgonoscope ---**

The best source for this information is contained within the book *Cancer Biopathy* by Wilhelm Reich (You will find this in chapter 4 "The objective demonstration of orgone energy.") (This section is also included in the intro book to organomy "Selected Writings") [To view a schematic try here.](#)

## MIND AND BODY

The Mind and Body are the most important research equipment in orgonomy, for without them all other equipment is useless. Wilhelm Reich began with this in understanding the human character to formulate character analysis and vegeo-therapie by observing the whole person as as an integation of the mind and body as one and not separate. The human being is a sexual organism and Reich discovered that an impeded sexual gratification and the inability to relax consciousness during an orgasm corralated to a disfunction in character as seen in psychoanalysis. Memory of trauma were found to be stored in unconsciousness and the body. Through breathing and minor manipulation of the musculature it was easier to release past traumas and memories of mind would surface as tightness in the body was released. This process surpassed the antiquated methods of Fruedian psychoanalysis that only dealt with the mind and associations that were mostly ineffective even after years of therapy. It is truely the beginning of the study of orgonomy. Through the freeing of armor also came a perception shift in relation to man and his surroundings. Almost all of the body-psychotherapy practices of today are founded on Wilhelm Reichs work in this area of study from the 1920's. Wilhelm Reich formulated a list of the rules of basic research . Reich's major claim is: "In reality I have made one single discovery; the function of the orgastic plasma pulsation." by W.R. This is observed from the microscopic studies, the the human character to the cosmic merger of energy streams in the universe. Research instuments are only an extension of our body's ability to perceive. If our body has impeded the flow of energy within it then our perception is also impeded.

## ORGONE FIELD METER

In the Reich's book "The Cancer Biophathy": The orgone field detect is composed of 2 metal plates covered with organic material dispose just like a capacitor, a lamp, and a transformer. The all parts cor by a metal wire.

When an orgone energy source is placed on the upper plate the lamp vary his light intensity, according to Reich.

## VACUUM TUBE AND ORGONE ENERGY

- Meteorological Functions in Modified Vacuum Orgone (VACOR) Tubes
- 

## GEIGER MULLER TUBE METER

Check any science catalogue ; ask your local schools for a catalogue. This is a very common instrument used in physical sciences but also usually very expensive. This instrument was used by Reich to measure the effects of orgone energy. Orgone energy reacts to various forms of electromagnetic radiation particularly high voltage, x-rays, radioactive material and ....

Reich's experiments used two gieger counters. Place one in a 20 fold orgone accumulator and record clicks per minute over a period of weeks. The accumulator should show over a week or more a change in the amount of clicks per minute. Also record measurements daily at a variety of locations near and further from the accumulator. The control geiger counter should work as normal while the one that has been affected by being charged in an accumulator will give unusually high counts per minute.

Also read more of these experiments in the "*Oranur Experiment*" by Wilhelm Reich.

## MOTOR FORCE OF ORGONE ENERGY

This device was triggered into operation by using Vacor tubes which had a vacuum and curved metal plates opposing within the tube and connected to electrodes on the exterior of the tube. These were at times charged in an orgone accumulator and later showing unusual displays of light which were not seen when charged with some electrical voltage. These tubes and the use of them were similar to a geiger counter tube. More on the motor can be obtained from literature available at the [Wilhelm Reich Museum](#) in Rangeley, Maine.
