

R-5000 No Frequency Change thru Computer Interface.

7-21-87

R-5000 receivers below serial number 804xxxx may not change frequency when operated with a personal computer/interface. To allow correct operation, replace IC-52 on the Control Unit.  
The correct part number for IC-52 is MBM27C128-25JA2.

CAUTION:

The R-5000 incorporates CMOS technology. Observe precautions for handling electrostatic sensitive devices.

This modification may be performed under warranty.  
Time required for this change is 1/2 hour or less.

=====

R-5000 - 30 MHz

To open the R 5000 up to 30 MHz you have nothing to do but to remove the D73,74,75,76 on the control-unit!
