

**FT-480 smeter mod****Author:** sylvain L

A simple modification just for fun... Add a S-Meter on a ft-480r.

Open the top cover and find the purple wire in the white connector with 12 wires in the left side...Just cut the purple wire and connect it to a s-Meter positive with purple and negative with ground and add a potentiometer to adjust the meter level thats all...it's works well and i can give a good signal report.
