

October 15, 2002

Dear Valued Customer,

Congratulations on your purchase of Remote Volume Mirroring (RVM) for your SGI® Total Performance 9400 (TP9400) or SGI® Total Performance 9500 (TP9500) Fibre Channel storage system. RVM ensures data protection through RAID-based, synchronous data replication without intervention from your host computer.

The feature has been activated on your system. Please review the Release Notes prior to using Remote Volume Mirroring.

Regards,

SGI
