8080 South Redwood Road
West Jordan Utah
Thursday, October 18, 2007 1:15 p.m.
to attend Paul Pantone's next court hearing.**

LATEST NEWS

Justin Heideman has appealed Judge Royal I. Hansen's June 8, 2007 order to force medicate Paul Pantone with psychotropic drugs dangerous to his survival. A stay of execution has been ordered to stop forced medication until the appeal is heard.

Reluctant public defender Loren Weiss has been released from the case. Public defenders Joan Watt and Karen Stam have been temporarily assigned to represent Paul Pantone against his wishes and despite the fact that they have a conflict of interest in representing Paul Pantone.

Gil Athay, Paul's fired attorney who turned against him, is a member of the Board of Directors of the Salt Lake Legal Defenders Association. This is the organization that Karen Stam and Joan Watt work for.

On Thursday, October 18, 2007, Judge Hansen will make a formal ruling as to who he approves to continue representing Paul Pantone: the public defenders or Justin Heideman, Paul's attorney of choice paid by the Paul Pantone Defense Project.

After over 18 months of waiting, a foot surgeon recently refused to treat Paul's broken foot after he saw the various untreated infections on his body. Since Paul had been put on antibiotics several times and had been taken off the antibiotics each time in mid treatment, there was also a concern that this level of medical malpractice at the Utah

State Hospital has made Paul's hepatitis C and other diseases, resistant to the medications.

Paul was recently able to see an Endodontist outside of the Utah State Hospital. This doctor told Paul he could restore most of Paul's maltreated teeth. The USH has not approved any return visits to this doctor, and still wants to extract most of his teeth with an in house dentist. Never mind the damage, it's cheaper.

The Utah State Hospital has insisted that Paul Pantone will not be treated for the hepatitis C he acquired since incarceration, unless he starts taking their dangerous psychotropic drugs. His recent appeal has empowered Paul to be able to continue to say no to the psychotropics, but either way, Paul Pantone is slowly and painfully being murdered by the Utah State Hospital staff.

Please pray for Paul Pantone.

**Attention tourists. Please boycott Utah.
Please scroll down to "Boycott Utah" where we explain how and why.**

- MORE NEW INFORMATION APPEARS IN RED AS YOU SCROLL DOWN -

Overview

Paul Pantone is the developer of GEET (Global Environmental Energy Technology). GEET is a clean energy saving technology that Paul Pantone developed to dramatically increase fuel efficiency in automobile engines, generators and other devices. Paul Pantone developed this technology to help save America and help save the world.

Paul was railroaded through a series of bizarre legal maneuvers by powerful and corrupt conspirators into a State Mental Hospital in Provo Utah where he resides today. He's supposed to be incompetent for claiming that one can fuel a car with mostly water using his system. Never mind the over 200 GEET devices in the US currently running on mostly water.

How did this happen? In the year 2000, Paul Pantone was offered many millions of dollars to sell off his rights to GEET. Paul was clearly threatened that there would be serious consequences to his future if he did not.

What is Paul's real crime against "the system"? Perhaps it is refusing to sell out, refusing to cash in and sell his patents, his company and his life's work for possible shelving - whatever the cost to him personally.

So Paul is suffering horrendous persecution promised by a powerful political machine determined to make him "go away". He has lost millions in the battle. He had no money left for effective legal representation. Strategic rumors have been intentionally spread in sensitive situations accusing Paul of unspeakable acts in order to incite horrific treatment against him by officers of the law and others. On occasion he has been secretly drugged. He was set up and framed for securities fraud. He was betrayed by a spouse with a secret history of drug abuse, who gave false testimony and committed numerous acts of perjury against Paul in open court. He was also betrayed by lawyers pretending to represent him (without a contract to secure their loyalty), ultimately working for patent infringing enemies or others building a corrupt case to destroy Paul. Paul's health has drastically deteriorated. Attorneys for the state have tried to have Paul legally and forcefully medicated with a Big Pharma cocktail of psychotropic drugs likely to permanently destroy his brilliant mind and credibility.

Is there an ongoing conspiracy to coordinate and support the various attacks against Paul and harass him to death with endlessly abusive "legal" maneuvers? We've seen enough to convince us that this is true.

GEET Modified Generator

Successful GEET Test on Geo Metro

Successful GEET Chevy 350 CID Motor

Hundreds of Paul's GEET devices are in use today in the US and beyond. Cars modified with the GEET system can expect a mileage increase of 20 % - 800 % depending on a number of factors. GEET modifications will often reduce a vehicles toxic emissions and greenhouse gasses by more than 90 %. GEET modified cars are legal to drive in many, but not all US states. That needs to change.

The conspirators have worked diligently to destroy Paul Pantone and yet Paul lives on.

We at the Paul Pantone Defense Project are committed to free Paul Pantone - an American Hero.

Here's what you can do to help.

Action Item # 1

Please pray for Paul Pantone and please pray for this grass roots defense project team to acquire divine encouragement, inspiration and empowerment in order to effectively help Paul..

Action Item # 2

The Paul Pantone Defense Project secured an attorney with superior intelligence and high ethical standards. His name is [Justin Heideman](#), and we are thoroughly convinced Justin is capable of effectively representing Paul Pantone. Justin is proving to be an integral member of our team and has exceeded our expectations. Justin has also had excellent results in freeing other inmates at the Utah State Hospital.

On April 18, 2007, the Utah Attorney General and the judge blocked our ability to have Justin represent Paul Pantone in court. Because the court has determined that Paul Pantone is "incompetent", Paul is not being allowed any say in who he wants as his attorney. Paul's friends with power of attorney are not being allowed any say either. Neither was Loren Weiss, an overworked and reluctant public defender who has pled to be released from this case. The judge ordered Loren Weiss to stay on as Pantone's counsel. This was a clear violation of Paul Pantone's basic civil rights. You can listen to an mp3 audio file of the hearing by clicking [here](#) or through the link below.

Does Judge Royal I. Hansen really want justice in this case? We think not. Heideman is the only person at this time in position to provide an effective defense for Pantone. In what we believe was a half hearted effort to appease the wrath of Pantone's supporters in the courtroom, Judge Hansen did rule to allow Justin Heideman to appear as a "friend of the court". He will be allowed to argue before the court but not to cross examine witnesses.

Under [Utah Code 63-30d-301\(5\)](#) Judge Hansen currently enjoys immunity from prosecution for his disturbing actions in this matter.

Now that Judge Hanesn has ruled on June 8, 2007 to have Pantone forcibly medicated,, we are told this can make it easier for the conspirators to gain control of Pantone's GEET patents. Paul can loose his memory and possibly die from the drugs they plan to give him due to his weakened condition from medical neglect at the Utah State Hospital..

We believe that further corrupt efforts to skew the legal process in order to destroy Paul Pantone, can be minimized by public presence in the courtroom. Here's how you can help.

Action Item # 4

Boycott Utah

As we have mentioned, under [Utah Code 63-30d-301\(5\)\(b\)](#) state employees (including judges) can engage in the following activities against Utah citizens and visitors with immunity from state prosecution:

assault, battery, false imprisonment, false arrest, malicious prosecution, intentional trespass, abuse of process, libel, slander, deceit, interference with contract rights, infliction of mental anguish, or violation of civil rights

This is how a judge like Royal Hansen can deny Paul Pantone and others their basic civil rights and get away with it ... at least for now.

We do not recommend visiting Utah as long as this law is in effect. Tourists aren't safe. For example, under this law, you could be publicly beaten by a policeman without just cause. The policeman can lie and say he never beat you. Even if you prove that the policeman beat you without just cause, he can still get away with it. This law is an open invitation for talented psychopaths to eventually entrench themselves in key positions of Utah government if they haven't done so already.

Please contact the following individuals and mention that you will be telling everyone you know not to visit Utah until [Utah Code 63-30d-301\(5\)\(b\)](#) is repealed, and the state stops railroading sane individuals like Paul Pantone to the Utah State Hospital.

Action Item # 5

Please write down a few encouraging words in a card for Paul Pantone. We think he will benefit from knowing that others appreciate his efforts to develop and protect GEET technology. We think his knowing that he is in our thoughts and prayers will help strengthen him through this difficult time.

Please mail your card certified and return receipt requested to:

Utah State Hospital
Forensic Unit
Attn: Paul Pantone
1300 E. Center St.
Provo, Utah 84603-0270

Please email us at geetfriends@gmail.com if you do not receive a certified receipt back from Paul Pantone.

Action Item # 6

Please tell others about Paul's plight.

Action Item # 7

Paul Pantone Defense Project Hotline
A Cyber Home for Sharing GEET Stories

1-510-594-GEET

If you are a GEET user, and you are comfortable in sharing your experience with the general public, please call our hotline and tell your GEET story to the world. Please leave a message on the hotline introducing yourself. You can use your first name only if you are not comfortable sharing your full name. We'll process your voice mail recording to try and spread your message to others here on the internet and elsewhere. Please also tell us what state you are calling from and then briefly tell us about your GEET experience. What type of car have you adapted with GEET? How old is the car? Can you tell us what your gas mileage has been like before and after GEET? How has the exhaust changed? Are you satisfied with GEET?

You can email digital pictures of yourself and/or your GEET device to geetfriends@gmail.com if you would like us to include the pictures with your oral testimony on this website. Please be sure to reference your voice mail message when you email pictures to us so we can match your voice message to your pictures.

Thank you GEET users for your support. Your testimony can help save Paul & the planet as it helps to convince the world and the courts despite numerous obstacles, that GEET is real.

A Layman's Review of the GEET System

Global Environmental Energy Technology (GEET) is a composition of unique fuel system components that allow an internal combustion engine's fuel efficiency to be increased substantially while dramatically reducing its toxic & greenhouse gas emissions by 90 % or more. Individuals have reported a 20% to 800% increase in fuel efficiency. The toxic exhaust reductions are so extraordinary that there have even been reports of GEET modified engines running for hours inside closed rooms with many people present without any known ill effect to person, plant or animal.

The GEET fuel system allows the by-products of combustion to be recycled back into the intake of the internal combustion engine through a system of unique components. The combustion by-products are altered such that they can support further combustion requiring only the addition of H₂O (water) to support the continued process.

While the GEET system varies from application to application, in general, the basic components are as follows:

1. A GEET modified carburetor
2. The GEET reactor chamber
3. The "Air Mix Valve" (AMV)
4. The "Bubbler"
5. The bubbler control mix valve

Fuels vary from waste petroleum products and regular petroleum products to soda pop and pickle juice. All of these fuels are usually diluted to less than 20% of the ratio of the mixture required to support combustion while the remainder is comprised of H₂O (water)!

The process is simple: Combusted gasses are introduced into the GEET outer/exhaust reactor chamber causing a voltage build-up in the chamber. The voltage build-up also has its associated magnetic field. The combined exhaust and bubbler [fuel/air mixture (primarily water and exhaust gasses)] components entering the inner/intake chamber of the reactor chamber pass through this same electro/magnetic field and are recombined into a combustible mixture and subsequently re-induced back into the engine via the modified GEET carburetor. The bubbler control valve controls the mixture of exhaust gasses returning to the engine and the Air Mix Valve (AMV) controls the amount of fresh air added to the reactor mixture returning to the engine.

While it is possible to run an engine manually on the exact principals described above, electronic control of the process can make the operation of a GEET modified internal combustion engine wonderfully simple.
