

April 15, 2007 - Distance from Sun 15 AU

Planet X incoming from below the ecliptic. Ideal position for start of continuous observation by the South Pole Telescope (SPT).

Solar Cycle 24

- Early Signs Aug-2006
- Four X-Class Flares Dec-2006
- SPT Operational Early 2007
- Highest Activity in 400 Years

Planet X Forecast for April 2007 to July 2014

YOWUSA.COM, 03-January-2007
Prepared by Jacco van der Worp
Intended for Discussion Only

planetxforecast.com

A diagram of Earth showing its axial tilt. The Earth is a blue sphere with a red line representing the axis of rotation. A horizontal blue line represents the equator. A red line represents the Tropic of Cancer. The angle between the axis and the perpendicular to the equator is labeled as 23.5°. A green arrow points to the Tropic of Cancer, which is labeled as the 'New current location of Tropic of Cancer'. Another red line is shown at a higher angle, labeled '26 degree increase'. The text 'Planes of the Equinox' is written near the equator, and 'Axis of Rotation' is written near the axis.

REVELATION

CHAPTER 8

VRS: 10-13

10 AND THE THIRD ANGEL SOUNDED, AND THERE FELL A GREAT STAR FROM HEAVEN, BURNING AS IT WERE A LAMP, AND IT FELL UPON THE THIRD PART OF THE RIVERS, AND UPON THE FOUNDATIONS OF WATERS:

11 AND THE NAME OF THE STAR IS CALLED WORMWOOD: AND THE THIRD PART OF THE WATERS BECAME WORMWOOD; AND MANY MEN DIED OF THE WATERS, BECAUSE THEY WERE MADE BITTER.

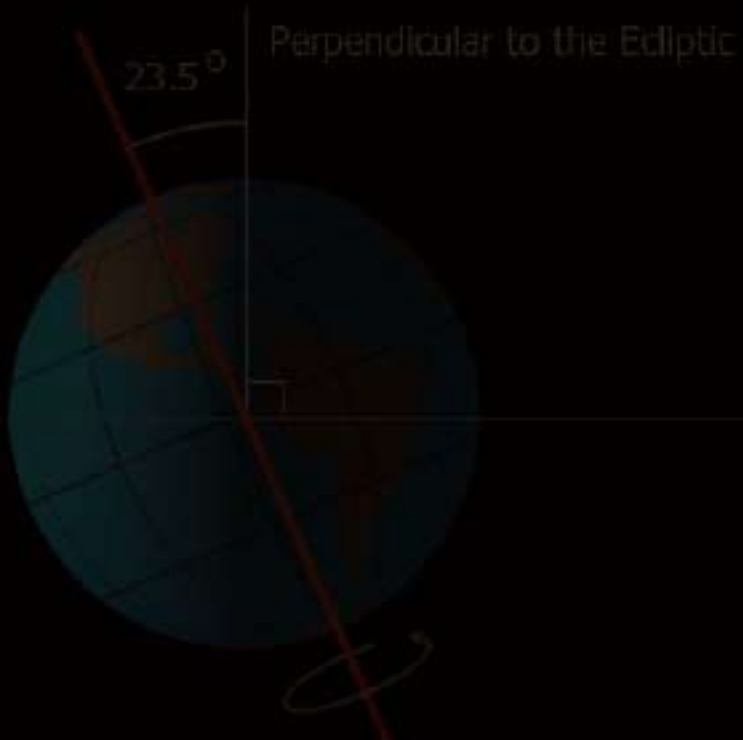

12 AND THE FOURTH ANGEL SOUNDED, AND THE THIRD PART OF THE SUN WAS SMITTEN, AND THE THIRD PART OF THE MOON, AND THE THIRD PART OF THE STARS; SO AS THE THIRD PART OF THEM WAS DARKENED, AND THE DAY SHONE NOT FOR A THIRD PART OF IT, AND THE NIGHT LIKEWISE.

13 AND I BEHELD, AND HEARD AN ANGEL FLYING THROUGH THE MIDST OF HEAVEN, SAYING WITH A LOUD VOICE, WOE, WOE, WOE, TO THE INHABITERS OF THE EARTH BY REASON OF THE OTHER VOICES OF THE TRUMPET OF THE THREE ANGELS, WHICH ARE YET TO SOUND!

[END OF CHAPTER EIGHT]

THE HOLY BIBLE

AUTHORIZED KING JAMES VERSION

THE: RETURN OF PLANET-X

WORMWOOD

MANKIND'S ONGOING LEGACY WITH A BROWN DWARF STAR

[a working hypothesis only]

The most current working hypothesis we have to examine concerning the expected return date of Planet-X coursing through the solar system centers around the prime fact that X's extended orbit (approximately every 3,600 years—first passing through the solar system in 'phase-one'—then back out again within 'phase-two')—now suggests that X's 'destructive cycle' occurs in two separate cosmic events.

This 'first-phase' begins with X's 'initial pass-through,' (possibly in 2009), then separated by approximately three years until its 'second-phase'—wherein "X" makes its 'second pass through' the solar system (expected in 2012). This second passage marks X's return leg back again into deep space beginning anew its 3,600 year long trek through the heavens. Planet-X's last return visit likely coincided with the Hebrew exodus from Egypt in 1447 B.C.E. under Moses.

The best researched dates include late summer (September 18, 2009) for "X's" 'first-phase' pass through and in early winter (December 21, 2012) for "X's" 'second-phase' pass through the solar system. Major earth changes will occur during both phases of "X's" passage with the most damage resulting in a possible 'pole flip' (a tipping of Earth on its axis of rotation 180 degrees) in "X's" second phase, December 2012. It's also possible that a complete 'pole flip' may not occur, however planet Earth may still suffer major planetary upheavals from "X."

And the name of the star was Wormwood... Revelations Chap. 8, Vrs. 11
