Subject: Touareg Accessories Update

Number: 009-08-05 UC

Date: 11/09/2005

We are excited to have the Touareg base rack bars available for purchase as an accessory. There are two different kits; one in silver, part number 7L0 071 126 A 666 and one in black, part number 7L0 071 126 A 041. Both of these kits include everything needed to install the formerly factory supplied unit. For dealer and retail pricing, please check Parts On Command.

Please note that the Touareg base rack bars are going to be standard equipment on V-6 Touareg's starting production the week of 2/2006. For the Touareg V-8, the bars will be put on the vehicles starting week 22/2006 of production.

We have released a new dealer install trailer hitch kit for the Touareg. Part number 7L0 092 105 UA comes with the hitch and all of the hardware to install the hitch, as well as a new control unit software. This kit does **not** include the ball, ball mount or final connector. The ball, ball mount and final connector can be sourced locally. The Touareg trailer hitch will no longer be sold as a complete set.

Speaking of Touareg trailer hitches, there are only two items that must be purchased to make the factory trailer hitch, option 1D6, a complete kit. The first item is part number 7L0 055 305 UA (seven pin connector) and part number 7L0 092 770 UA (ball mount assembly). Both of these items can be purchased locally if this better suits your needs.

We hope this information will assist you in selling these accessories to your customers.

Good selling!
