

### Track down nuclear submarine using white light laser.

My true experience.

A nuclear submarine will leave some nuclear traces. This trace of nuclear waste has an energy within the white light laser range. Comparing this energy, we could track down the path of this nuclear sub. This equipment can be installed in any boat.

Nuclear submarine go into deep sea to avoid detection.

But there is no escape from us

## Track down Nuclear submarine

### Technical specifications

Applications: Track down nuclear submarine  
Laser: White light  
Submarine: Nuclear  
Accuracy: Few ppm of nuclear radioactive waste

### Optional:

Fast tracking boat

### Capability:

1/ Track down nuclear submarine until it surrender
