

## Operation Manual

### Guitar Amplifier SVT-H50R

#### ★ CONTROL FUNCTIONS ★

- INPUT** ----- Connection for instrument.
- GAIN** ----- Sets the amount of gain.  
Higher settings provide more overdrive sound.
- TREBLE** ----- Provides high frequency equalization as required.
- MIDDLE** ----- Provides midrange equalization with cut and boost.
- BASS** ----- Provides desired amount of bass response.
- PRESENCE** ----- Controls the high frequency level of the signal.
- MASTER** ----- Adjusts the overall volume of either the "Clean" or "Drive" channels.
- REVERB** ----- Adjusts the amount of reverb added to the normal signal.
- STANDBY SWITCH** ----- Toggle this switch when turning the amp on. Wait 30 seconds, before switching out of standby mode to promote longer tube life.
- POWER SWITCH** ----- Turns amplifier ON & OFF.
- FOOT S/W** ----- For connection of a single button foot switch for boost select.

# STRAUSS

## 3 year Warranty

Strauss Amplification guarantees its products against any defect arising from faulty materials and/or workmanship for a period of THREE YEARS from date of purchase (Loudspeaker components are covered for a period of one year & valves are covered for a period of three months). Strauss Amplification reserves the right to repair or replace any faulty item at its discretion.

Proof of purchase must be produced at the time of the warranty claim. The warranty is void if the product has been damaged by excessively rough usage, alteration, modification, misuse, accident or neglect.

Transportation/Freight and handling charges are not included in this warranty.

Any service performed by persons other than authorized Strauss service agent is not reimbursable and completely voids warranty.

This warranty card should be completed and **retained by the purchaser** to facilitate prompt dservice in the event of a claim.
