

SOFTWARE INSTALLATION

SP1007E

Manual

English

Installation

1. Download the application software

- Download the software from the HAMEG Instruments Homepage (www.hameg.com)
- Choose your product by the product menu: Products > Oscilloscopes
- Choose your product and click on Software/Firmware
- You can download the Software by clicking the download button
- Please save the file on your hard disk.

2. Installation of the software

- To start the installation, double click on the downloaded SP107E_V302.exe file.
- You will need administration rights to install the software correctly.
- In the upcoming command prompt choose "install as administrator" and insert your administration login data.

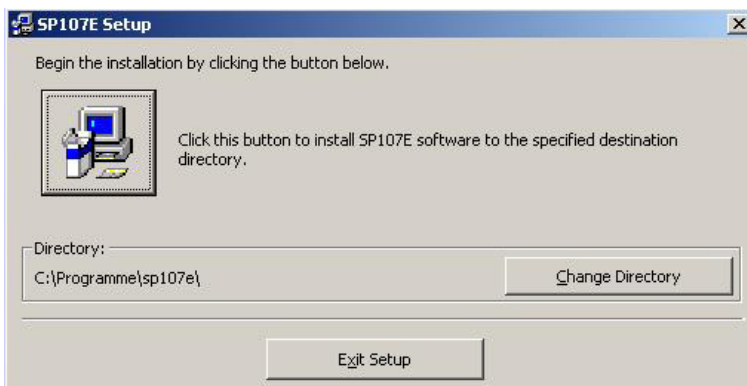

The following screenshot shows the error message of insufficient installation rights:

- After starting the installation, the installation wizard will guide you through the product installation. A detailed explanation of each installation step is provided below:
- Please close all open documents and programs to avoid data loss before continue with the installation process.
- To start the installation process click 

- In this dialog box, you should select a folder in which you want to install the program.
- Please check that there is enough space on the indicated drive. Network drives are not supported for installing the software.
- Probably you may create a new subfolder for the application. Setup will extract all files into the designated folder without creating new subfolders.
- To start the file extracting process, please click 

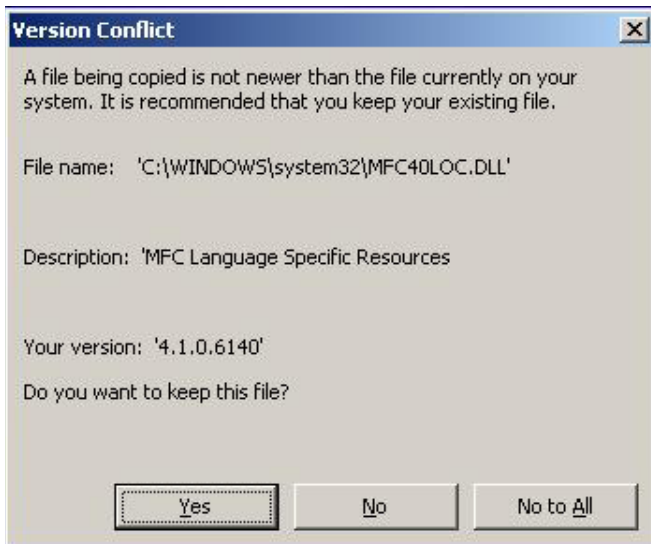

- Please choose your start menu folder and click

Continue

- Setup will now copy the files on your hard disc.

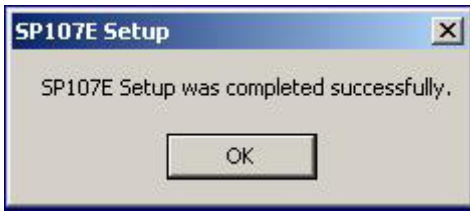

- Probably some of your system files are newer than the files provided with this software. In this case keep the newer file by clicking

Yes

in the appearing dialog box.

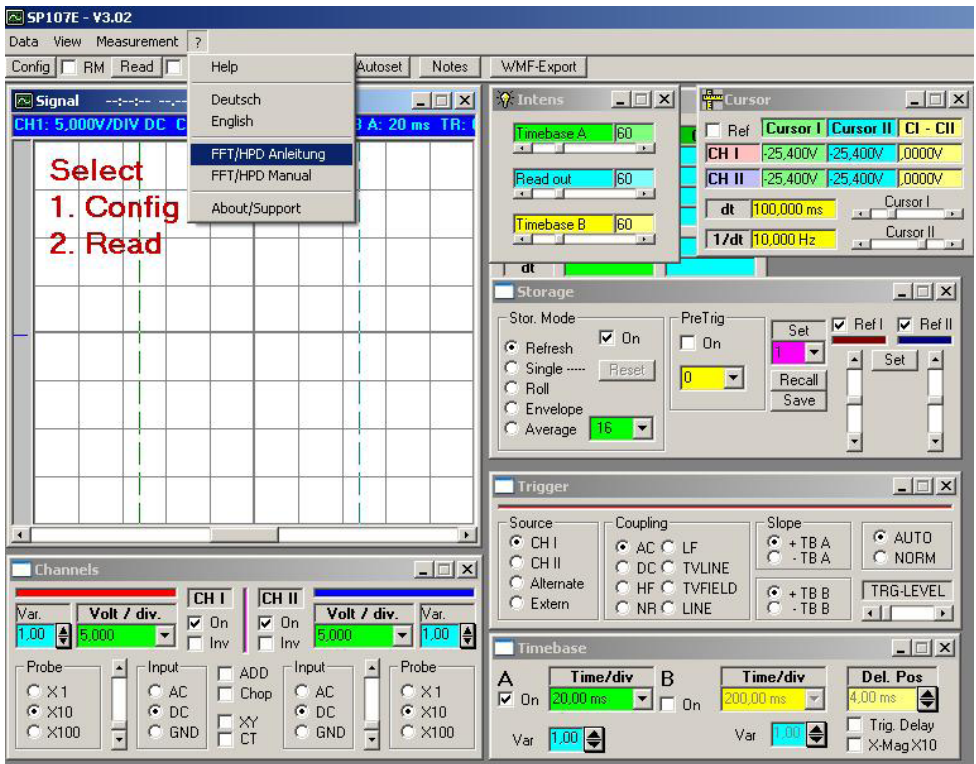

- If the installation has been completed, the following message will be shown:

Documentation of the software:

The respective documentation of the general software as well as the detailed information of the FFT module and the harmonic current emission module is implemented in the SP107E software menu bar.

To view the manuals click on the question mark at the right side of the software menu bar like shown at the picture down below.
