
IMPACT Channel Option Software for Indigo² IMPACTTM Systems

IMPACT Channel Option (ICO) is supported on Indigo² Solid IMPACTTM, Indigo² High IMPACTTM, and Indigo² Maximum IMPACTTM systems with R4400[®] and R10000TM CPUs running IRIXTM 6.2 with Indigo² IMPACT 10000 Support (Part # 813-0469-002) or a later release. Patches 1406 and 1447, or their successors (Patches for IRIX 6.2 with Indigo² IMPACT 10000, Part # 813-0591-001), are required for the operation of ICO on Indigo² IMPACT systems.

Note: IRIX 6.2 with Indigo² IMPACT 10000 Support requires NFS 6.2.1 or NFS 6.2 version 1.2. Detailed information for each patch can be found in the release notes on the patch CDs.

Release Notes

Customers using the 2@800x600_60 or 2@800x486_30i formats should obtain an updated copy of the format files for these formats. A new copy of the format files is available via anonymous ftp from SGI:

ftp.sgi.com:/sgi/IRIX6.2/ICO/impact_ico_sdb.tar
ftp.sgi.com:/sgi/IRIX6.2/ICO/impact_ico_sdb.README

The new format files should be installed *after* patches 1406 and 1447 have been installed. See the README file in this directory for details.

Questions?

For any questions concerning installation or use of these patches, contact your local authorized SGI service provider.
