

Compaq Server Options 1U Keyboard Drawer and Internal Keyboard

Compact 1U design for drawer and keyboard saves space in racks

Designed to work together to save room in space-constrained rack-mount environments, the new Compaq 1U Keyboard Drawer and Internal Keyboard with Trackball give corporate IT managers extraordinary convenience, reliable performance and improved manageability.

The 1U Keyboard Drawer requires only half the depth of other keyboard drawers and provides mounting options for Compaq Keyboard/Monitor/Mouse switches. When this drawer is coupled with other space-saving options like the 2U TFT450R monitor, rack options that once occupied 12U or more can be condensed to only 3U—creating additional space for more critical server and storage devices.

The Compaq Internal Keyboard and Trackball—designed to fit neatly inside the keyboard drawer—is among the first to provide hardware support for the Euro currency symbol used in European Community (EC) markets. Rugged construction and long life expectancy provide additional convenience and investment protection.

Together with other Compaq rack-mountable solutions, including servers, uninterruptible power supplies and other technology for networked environments, the innovative 1U Keyboard Drawer and Internal Keyboard are integral parts of the complete Compaq answer to enterprise computing.

NEW 1U Keyboard Drawer and Internal Keyboard

→ Key Features

- 1U Keyboard Drawer saves space and is ergonomically designed for maximum comfort
- Built-in trackball and two mouse buttons in keyboard provide touch sensitive feel for speedy page navigation
- Keyboard includes Euro currency symbol; supports multiple international languages
