

Compaq and Oracle.com – Oracle E-Business Suite Certified Configurations from Compaq

Total application solutions

Complete acquisition, simplified implementation. It's about time.

A truly simple solution needs to be complete – no strings attached. Complete refers to far more than just the software component of a customer's environment. It refers to the entire platform, including hardware, storage, networking components and services.

Deployment is a key element to reduce complexity. Together, Compaq and Oracle are waging a war on complexity by creating simple and complete solutions to deploy the Oracle E-Business Suite. Nothing is left to chance with the Oracle.com solution, Compaq *ProLiant*™ DL580 and DL360 servers pre-tested, pre-configured and pre-installed with the Oracle E-Business Suite.

Why did Oracle choose Compaq as its first to market partner and most recommended Intel platform?

- > Years of joint engineering on superior reliable, scaleable and fully manageable Compaq *ProLiant* servers
- > Worldwide Compaq/Oracle Excellence Centers available to support our mutual customers

- > A global force of professional services personnel to assist and support your business goals

Anyplace - The choice is up to you

Oracle has traditionally hosted their applications by procuring and managing the hardware as part of a hosting contract. Today, however, some customers prefer the option of purchasing and managing their own hardware, while relying on the application vendor to manage their applications.

With the Oracle.com solution, companies can choose a deployment option to fully meet their needs.

@Customer

With the Oracle.com @Customer (Your Place) model, customers deploy the *ProLiant* DL580 and DL360 servers in their IT environment and have Oracle maintain and manage the software from Oracle's data centers and a worldwide network of hosting partners. An added benefit of this solution is guaranteed service levels.

@Oracle

With the Oracle.com @Oracle (Our Place) model, companies can license and access the E-Business Suite in a fully hosted environment maintained by Oracle. Oracle will procure and manage the hardware as part of the hosting contract, and will install and manage the platform and applications in their data centers and at hosting partners around the world.

ORACLE®

Compaq and Oracle.com – Oracle E-Business Suite Certified Configurations from Compaq

Compaq ProLiant DL580

Compaq ProLiant DL360

The Oracle Certified Configuration from Compaq is on a ProLiant DL580 server pre-tested and pre-configured with the Oracle 8.17 and E-Business Suite 11i. New additional but optional servers let you do business over the Internet with two new Certified ProLiant DL360 servers. These two new additions support Internet services by adding Oracle Express Server and Oracle Internet Server. All ProLiant Certified Configurations run on the SuSE Linux OS.

The entire solution stack is delivered pre-configured, pre-tested and pre-installed with all necessary components to ensure rapid uptime and ease of deployment. Customers purchase the software and hosting services from Oracle and then buy the certified hardware with software pre-installed from Compaq (U.S.) or jointly authorized resellers.

For more information visit compaq.com/oracledotcom

For more details or to purchase this fully integrated solution, or if you are interested in receiving future updates on our plans for additional supported configurations please contact us at certified.configs@compaq.com.

Compaq ProLiant DL580 with Oracle 8.17, 9iAS and 11i Application Server

- > Compaq ProLiant DL580 server with (4) 700 MHz PIII Xeon Processors – in rack-ready or rack mounted systems
- > Integrated Compaq NC3134 Fast Ethernet NIC 64 PCI Dual Port 10/100 in a slot (upgradeable to Gigabit)
- > Compaq UPS R3000
- > (4) GB RAM
- > (2) 18.2 GB Ultra3 SCSI drives
- > Compaq Smart Array 5302/64 controller
- > Compaq StorageWorks™ 4314R
- > (14) 36.4 GB Ultra3 SCSI hard drives
- > Redundant power supply
- > TFT5600 rack mount integrated keyboard and monitor (only in rack mounted systems)

Compaq ProLiant DL360 with Oracle Express Server

- > Compaq ProLiant DL360 rack-mountable server with (2) PIII 1 GHz/1.266 processors
- > Integrated NC3134 Fast Ethernet NIC 64 PCI Dual Port 10/100 in a slot (upgradeable to Gigabit)
- > (2) GB RAM
- > (2) 18.2 GB Ultra3 SCSI drives
- > Compaq Smart Array 5302/64 Controller
- > Compaq StorageWorks Enclosure Model 4314R, rack-mountable
- > (14) 36.4 GB Ultra3 SCSI 10K hard drives

Compaq ProLiant DL360 Oracle Internet Server

- > Compaq ProLiant DL360 rack-mountable server with (2) PIII 1 GHz/1.266 processors
- > Integrated NC3134 Fast Ethernet NIC 64 PCI Dual Port 10/100 in a slot (upgradeable to Gigabit)
- > (1) GB RAM total
- > (2) 18.2 GB Ultra3 SCSI drives
- > Compaq Smart Array 5302/64 Controller
- > Compaq StorageWorks Enclosure Model 4314R, rack-mountable
- > (14) 36.4 GB Ultra3 SCSI 10K hard drives

Software Environment

- (Pre-integrated and preinstalled by Compaq or jointly approved resellers; Oracle software and services sold by Oracle)
- > Oracle E-Business Suite, Oracle 8.17, Oracle 9iAS, Oracle Express, and Internet Server – licensed and managed by Oracle
 - > SuSE Linux – licensed and supported by Compaq

Customers should engage with Oracle to purchase the Oracle.com @Customer or @Oracle implementation models. Customers will then purchase the pre-configured hardware solution from Compaq or through a jointly authorized reseller partner.
